- 5/8" Diameter Stainless Steel Free-Spinning Upper & Lower Locking Bolts
- Frangible Break-Off Lever (Thwarts Chain/Pickup Truck Attack)
- 6 Bolt Stainless Steel Anti-Pry Plate
- 2 Hinge-Side Locking Bolts
- Thru-Bolting For All Locking Bolts
- All Bolts Into Frame, None To The Floor
- The Trigger Hits The Strike Each Time The Door Closes & Automatically Projects The Deadbolts To Lock The Door
- Designed For New Door Or Retrofit Installation
- Key Or Electrically-Released Exterior Trim
- Optional:
 - Door Position & Bolt Position Signal Outputs
 - Piezo Output To Indicate When Exterior Lever Is Unlocked
 - Door Reinforcement Kits For Added Protection

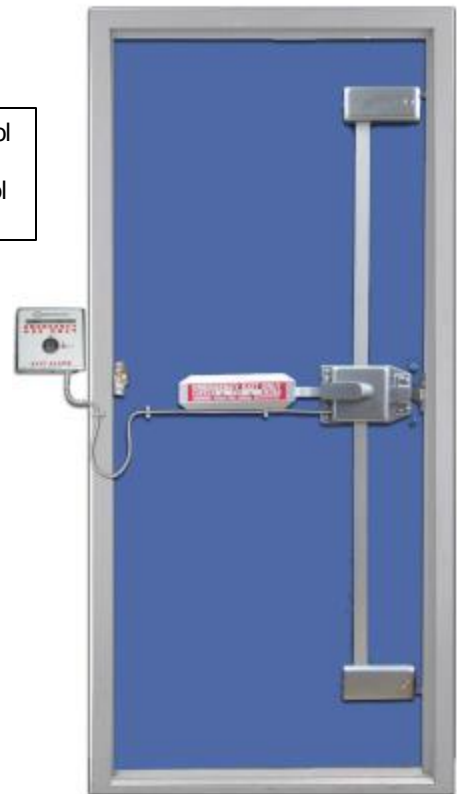

Mechanical Outside Key Control
TEL-MD-KLT-AP
Electrified Outside Key Control
TEL-MD-KDT-AP

How Does It Work?

The trigger hits the strike each time the door closes and automatically projects the deadbolts. Exiting is accomplished via pushing the paddle (at any time). Entry is by key, or by electric release, which allows the lever to be pulled down to retract the locking bolts.

Easily Integrate With Any Access Control System

Our exterior control trim is electrified and can be integrated to any access control system. All it needs is a signal to release the lock and allow access.

MODEL INFORMATION

- #TEL-MD20 : TridentMD-Self Locking
- #TEL-MD21 : TridentMD-Self Locking with Battery Alarm
- #TEL-MD22 : TridentMD-Self Locking with Hardwired Alarm
